

REMARKS

Claims 1-6 were pending in the application. Claims 1 and 5 have been amended. No new matter has been introduced. Thus, claims 1-6 are pending for reconsideration at this time.

In the Drawings

Figures 1C, 3a-3e, 4d and 4e stand objected to as not being of sufficient quality for all of the details to be reproduced in the printed patent. New Figures are provided along with this Amendment & Reply.

Figures 4a-4e also stand objected to because they do not include the reference character 45. The reference character 45 has been deleted from the specification.

Withdrawal of the objection to the drawings is solicited.

In the Specification

The specification stands objected to because the Brief Description of the Drawings does not describe Fig. 2d. The specification has been amended accordingly. Withdrawal of the objection to the specification is solicited.

In the Title

The title stands objected to as not being descriptive. Applicants have amended the title to recite "Method for Forming a Semiconductor Device with a Hard Mask Layer Formed Over a Bit Line to Protect the Bit Line During Subsequent Etching Steps" as kindly suggested by the Examiner. Withdrawal of the objection to the title is solicited.

Claim Objections

Claim 1 stands objected to as step (f), line 4 should include --are-- after "hole" to be grammatically correct. Claim 1 has been amended accordingly. Withdrawal of the objection to claim 1 is solicited.

Rejections Under 35 U.S.C. §112, ¶2

Claims 1 to 6 stand rejected under 35 U.S.C. §112, ¶2 as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention.

Claim 1 stands rejected as being incomplete for omitting essential structural cooperative relationships of elements in step (d). Claim 1 has been amended accordingly.

Claim 5 stands rejected as being inconsistent with the specification. Claim 5 has been amended accordingly.

Withdrawal of the rejections under 35 U.S.C. §112, ¶2 is solicited.
